MONITOR is much more than just cameras in the cloud

UNIVERGE BLUE MONITOR is a cloud-based platform that allows you to remotely or locally monitor all locations, minimize security threats, improve customer experience, and enhance productivity satisfaction and brand loyalty.

MONITOR Key Differentiators

Open Platform

- **Platform agnostic:** NO hardware or software lock-in. Use Existing or new cameras from multiple manufacturers. Use MONITOR at the same time as legacy VMS solutions. Supports web browser, iOS, and Android.
- **Supports an Open API:** Incorporates standard data formats. Easily integrate with 3rd party software and solutions.
- **Highly secured 24/7 recording & archiving secure:** TLS 1.2 protocol, data stored with AES 256 encryption algorithm, GDPR, SOC2, SOC3 compliant
- **Camera agnostic:** Supports ONViF cameras to work with most cameras. You can connect by UNIVERGE BLUE SERVER.

Please visit: www.univergeblue.com or

Manage sites from anywhere/anytime:

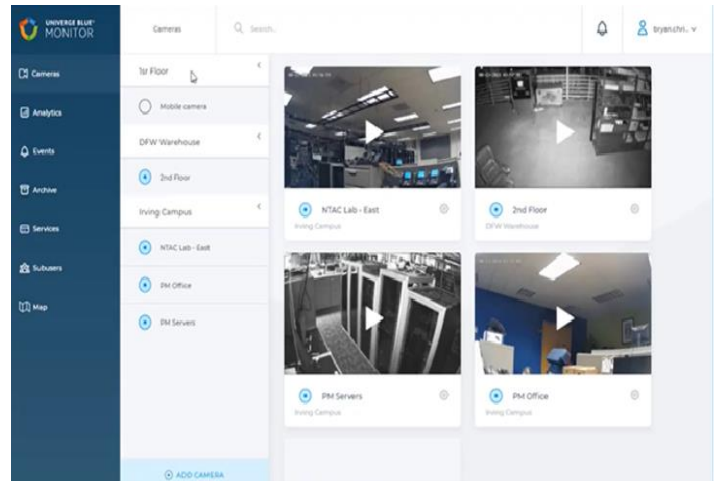

- ✓ **Highly secured 24/7 recording & archiving.**
- ✓ **Web browser-based VMS:** MONITOR can be accessed from any desktop, tablet, or phone via a web browser.
- ✓ **iOS and Android apps:** Access via an iOS or Android Mobile app on your mobile phone from anywhere.
- ✓ **Notifications:** MONITOR automatically triggers notifications to the security/operations team on specific events such as motion detection, perimeter breach, and other AI events.

Easily Monitor all locations

- ✓ **Monitor can centrally monitor all locations or locally**
- ✓ **Video Wall:** MONITOR allows you to view multiple cameras from multiple locations in a centralized video matrix

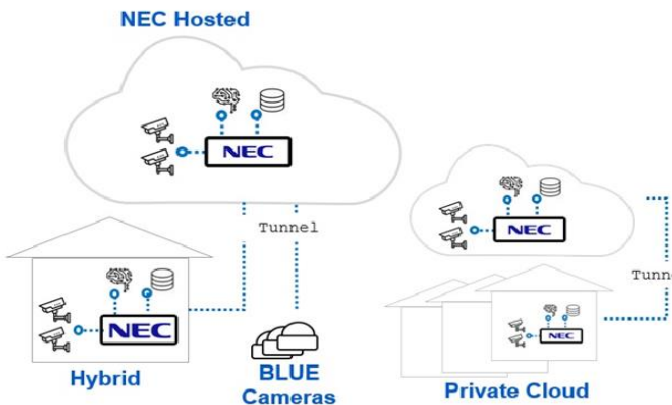

Easily scale your surveillance:

- ✓ **Add cameras and sites:** Easily add an unlimited number of cameras and sites
- ✓ **Add sub-users:** Add sub-users and set permission for those sub-users to monitor

Run it anywhere

- ✓ **NEC Hosted (BLUE CLOUD):** Complete Plug-n-Play Solution
- ✓ **Private Video Cloud (BLUE Server):** Run it on private infrastructure. Install the video server at your location
- ✓ **Hybrid/On-Prem (BLUE Server)**
- ✓ **Run it Anywhere – NEC Hosted/Private Cloud/ On-Premise/Hybrid:** Streaming, recording, and processing anywhere; on device, on-premises, and on the cloud, tunneling between nodes to access the live and recorded video from anywhere.

AVAILABLE PACKAGES

- **Motion Recording (30, 60 or 90 days)**
- **Continue Recording (30, 60 or 90 days)**
- **Options (SD card recording, broadcast streaming, Blue Monitor streaming, Blue Server options)**

And more to come soon. So, stay tuned!
